### World Wealth Report 2021: North America breaks 5-year trend and overtakes APAC in High-Net-Worth population and wealth

Paris, June 29, 2021 – The global high-net-worth individual (HNWI)<sup>1</sup> population grew 6.3%, surpassing the 20-million bar, while HNWI wealth grew 7.6% in 2020, nearly reaching USD80-trillion. Boosted by rising equity markets and government stimulus, North America surpassed Asia-Pacific to become the 2020 leader in both HNWI population and wealth. The 25<sup>th</sup> anniversary edition of Capgemini's World Wealth Report (WWR) examines global wealth evolution in the past year and HNWI trends and influences from the last quarter century.

In 2020, the ultra-HNWI segment led overall HNWI population and wealth growth at 9.6% and 9.1%, respectively, while millionaires next door and mid-tier millionaires had lower population and wealth growth at around 6% and 8%, respectively.<sup>2</sup>
